

# BACK TO WORK

## SERVICE GUIDE

**10% Off**  
on selected  
services

Reopening soon?

Let us help you get  
back on your feet!

# Recommended Services

We are all living through difficult times, but as businesses are starting to reopen, we want to help you get back up and running in these strange circumstances. We have put together a list of our services designed to help your business, your employees and to help make your customers and visitors all feel safe.

## PPE Disposal and Hygiene Units

These purpose-built bins are specifically for PPE such as gloves and masks. The main benefit of having a dedicated PPE bin is to avoid contamination in recycling bins. They can be fitted with a pedal or sensor motion lid and there is also a built-in automatic hand sanitiser dispenser unit.

## Professional Bin Cleaning

Bin cleaning is an important process to improve hygiene standards, reduce viruses and bacteria and eliminate pests and odours. This service uses powerful jets and a high-quality cleaner that kills up to 99.9% of bacteria and viruses, including coronaviruses. Bin storage areas can also be cleaned and disinfected.

## Internal Bin Solutions

Bins can be a high touchpoint area and minimising these are important. Using bins that don't need to be opened by hand will reduce the risk of contamination for employees and customers. We have a range of styles to suit different businesses.

# Recommended Services

Offer comfort to both employees and customers by ensuring that you're doing the most to make your workplace hygienic, healthy and safe.

## Shredding Services

Confidential waste needs to be securely destroyed. At a time when employees may have secure documents from working at home that need destroying and space is crucial, arrange a confidential waste collection now. Secure bags and consoles available.

## Rubbish Removal and Clearances

When space is at a premium, take advantage of our rubbish clearance service. We're offering our existing customers 10% off. From a safe distance we will attend your site, collect what you're getting rid of and dispose of in the most appropriate way.

## Increase Collection Frequency

Not having waste hanging around is an important aspect of the government's guidelines. If you want to increase the frequency of collections, please get in touch and we will make this as easy as possible.

# Government Guidance

The government has been issuing advice all throughout this pandemic, and we want to highlight the most recent guidance regarding waste collection services.

To help everyone maintain good hygiene, consideration should be given to providing more waste facilities and more frequent rubbish collection. Therefore, if your business is back open and you want to ensure that staff and customers remain safe then please feel free to contact us today to increase your service frequency or to increase the quantity of containers on your site.

Simply Waste Solutions is here for your business and all of its waste needs so don't hesitate to contact us for advice on best practice. We welcome you and your business back, and hope that you continue to stay safe!
